

Design of a Use Case Diagram for a Software System and defining User Stories

Group-03

Name	ID
Afsana Hena	2252421109
Marjia Khatun	23524202071
Mihir Bormon	23524202121
Alvee Ahnaf Khan	23524202141

User Stories:

a. Registration & Security

- As a user, I want to register for an account by providing my name, address, and contact info so that I can join the platform.
- As a user, I want to accept a liability waiver during registration so that I understand the legal responsibilities regarding food safety.
- As a user, I want to verify my email address so that I can activate my account and start using the system.
- As a user, I want to log in securely with my email and password so that I can access my donation dashboard and history.

b. Restaurant Partner

- As a Restaurant Partner, I want to post a new donation with item details and pickup deadlines so that orphanages are aware of available surplus food.
- As a Restaurant Partner, I want an optimized, simple interface for listing food so that I can post donations quickly during my busy rush hours.
- As a Restaurant Partner, I want to mark a donation as "Picked Up" once the transaction is complete so that it is properly recorded in my history log.

c. Orphanage Partner

- As an Orphanage Partner, I want to view a list of available donations so that I can find food to provide meals for my residents.

- As an Orphanage Partner, I want to sort available food by pickup deadline so that I can prioritize urgent collections and avoid food waste.
- As an Orphanage Partner, I want to claim a donation so that I can secure the food and receive the restaurant's contact details for coordination.

d. System Coordination & Administration

- As a user, I want to view the contact details of my partner once a donation is claimed so that we can coordinate the specific pickup logistics.
- As a System Administrator, I want to approve user accounts so that I can ensure only legitimate restaurants and orphanages are using the platform.
- As a System Administrator, I want to generate impact reports so that I can track and share the total amount of food saved and donated through the system.
- As a System Administrator, I want to monitor the platform and fix disputes so that the system remains reliable and trustworthy for all partners.
